# THE VALUE IN FAIRS

Fairs are commercial spaces that bring excellent opportunities for medium and small businesses to showcase and sell their products.

Also, they provide the right environment for networking that could generate new business with distributors or importers that would help you commercialize your products outside of your country.

In this guide, you'll find the most prominent and popular handmade fairs in Latin America. The information is displayed by regions, starting from the north with Mexico and moving towards the south with Brazil. Some of the dates are tentative and may vary, so make sure to keep an eye out for the ones you're interested in. The idea is to aid you in planning your visits so you can make the most of this experience!
